QUARTERLY RECAP

Q1 2023

1. As highlighted in our 2023 Outlook, volatility has persisted across all segments of the market. Uncertainty surrounding Fed policy, angst in the banking sector, and oscillating fears of recession kept volatility elevated.
2. We headed into 2023 with the notion that inflation will trend lower, but the path of reduction would not be smooth. This has been the trajectory thus far. We continue to see inflation measures contract, but the route remains unsettled.
3. Since the onset of Covid-19, investors have experienced incredible bouts of volatility, which we believe may continue. Staying disciplined, even when uncomfortable, has rewarded investors over the long-run.

Inflation Perspectives

Headline inflation has been moderating, but more recent trends show further slowing. Additionally, housing, which is incorporated into CPI on a lagged basis, points to further softening as we head into summer.

Market Implied Probability for December 2023 Fed Fund Rate

Wavering markets, inflation volatility, and uncertainty surrounding the economy's direction has led to rapid and significant shifts in expectations for Fed rate policy.

Source: CME FedWatch Tool. As of March 29, 2023.

Staying Invested - Growth of \$100 since Pre-Covid Peak

Despite volatility and bear markets, staying invested since the onset of the global Covid-19 pandemic has rewarded investors compared to shifting to cash.

Source: Morningstar Direct. Growth of \$100 from February 19, 2020 to March 31, 2023. Equity = S&P 500 Index, Fixed = Bloomberg US Agg Bond Index, Cash = Bloomberg US Tbill 1-3M Index. Blends are rebalanced monthly at listed weights.

Labor Market Remains Resilient

The consumer is the bedrock of the U.S. economy. Strong financial positions for consumers and a resilient job market have helped mitigate the risk of an extreme recession.

Source: FactSet, DOL. As of February 28, 2023.

U.S. Dollar Continues to Fall

Falling rates in the U.S., slowing inflation and shifting expectations for Federal Reserve rate cuts later in the year put further pressure on the U.S. dollar relative to other major currencies. The dollar index fell 1.0 percent in the first quarter.

Source: FactSet. As of March 31, 2023.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss.

Rents - Surveyed vs. Reality?

Owners equivalent rent, a key component in the CPI calculation, continues to climb. However, recent "market" data shows rents may have plateaued last summer and, with a softening housing market, may help drive inflation lower.

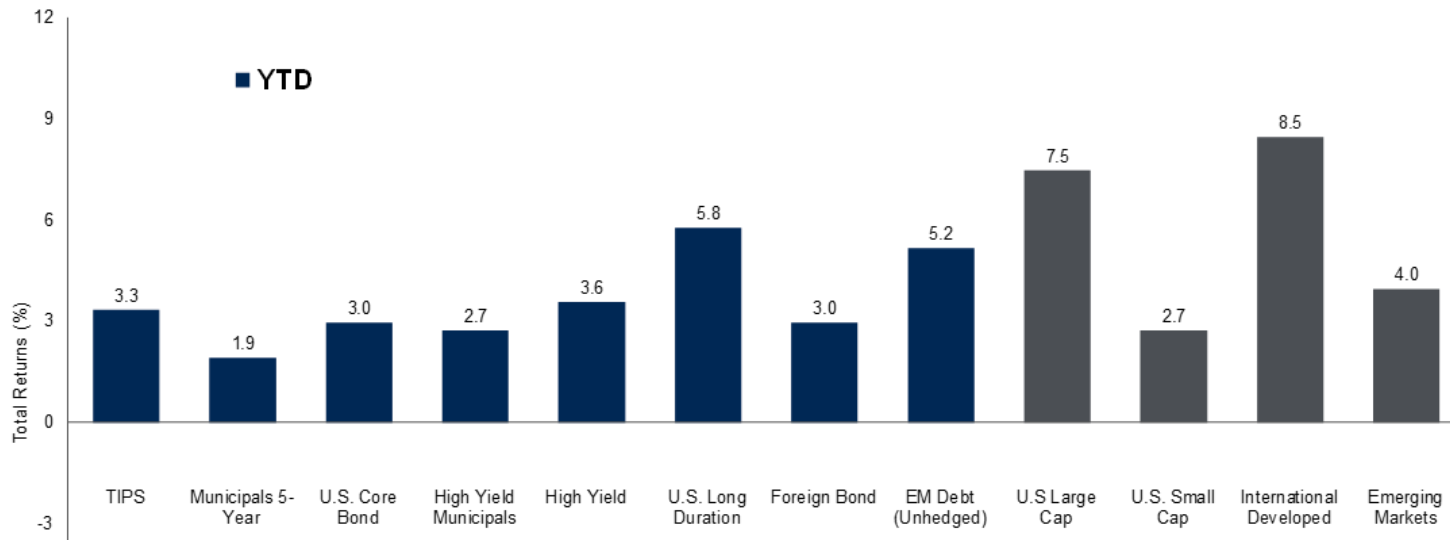

Source: FactSet, BLS, Zillow. As of February 28, 2023.

Shifting Earnings Sentiment

Market expectations for corporate earnings have shifted significantly since the end of 2022. As we've highlighted, earnings are likely "the next shoe to drop" in this cycle following 2022's decline in prices across asset classes.

Source: FactSet Earnings Insight. As of March 31, 2023.

Fixed Income (1Q)

- + Interest rate markets were highly volatile in the first quarter, as investors grappled with Fed policy action and banking sector uncertainty. Ultimately, rates ended lower, providing a tailwind for bond investors.
- + Credit sectors generally fared well, even with spreads widening at the end of the quarter with the turmoil stemming from the banking sector.
- + Inflation expectations were volatile during the quarter, rising sharply in February before settling back in March. TIPS outpaced Core Bonds in the quarter as a result.

Equity (1Q)

- + Despite volatility caused from the fallout of Silicon Valley Bank (“SVB”), equity markets overall fared well in the first quarter. Swift action from policy makers helped instill confidence to calm markets.
- + Non-U.S. developed led equity markets during the quarter. Strength in Europe early on helped pave the way despite volatility picking up in March. A falling dollar provided an added tailwind.
- + Emerging market equity posted a modest positive return. Mexico was a key driver, gaining over 20% in the quarter.

Sources: Morningstar Direct. As of March 31, 2023.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss.

U.S. Treasury Yield Curve

Interest rate volatility was elevated during the quarter. The Fed raised its target rate by 25 bps in both February and March, pushing yields on the front end of the curve higher. However, disruption in the banking sector and uncertainty about economic growth pushed longer dated yields lower.

Source: FactSet. As of March 31, 2023.

Corporate Market Spreads – Trailing 5 Years

Disruption in the banking sector in March pushed corporate credit spreads wider at the end of the quarter as investors grappled with the potential for further contagion.

Source: FactSet. As of March 31, 2023.

See disclosures for list of indices representing each asset class. Past performance does not indicate future performance and there is a possibility of a loss.

Index Performance Attribution (1Q 2023)

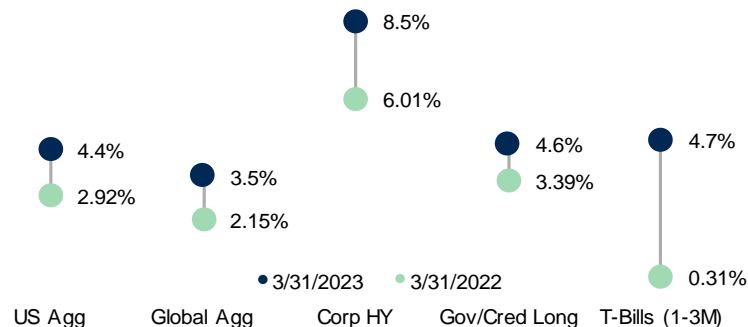

Non-government sectors, relative to similar duration Treasuries, were mixed in the quarter. Corporate high yield strength early on overcame volatility and concerns stemming from the March banking sector crisis, while mortgages modestly lagged as interest rate volatility weighed on the sector.

Source: FactSet. As of March 31, 2023.

Current Yield-to-Worst vs. 1 Year Ago

Fixed income yields have seen a large jump from one year ago on the back of higher interest rates. While performance has suffered over the last year, the prospect for fixed income going forward looks more attractive at these yield levels.

Source: FactSet. As of March 31, 2023. Based on respective Bloomberg index.

Equity Valuations (Trailing PE – Last 15 Years)

Valuations edged higher as prices rose and earnings fell. The U.S. market ends near median levels compared to the last 15 years, while international and EM look more attractive on an absolute and relative basis.

Source: FactSet. As of March 31, 2023.

U.S. Equities – Return by Sector (1Q 2023)

Equities were narrowly driven by growth related stocks in the information technology and consumer sectors. Constituents such as NVIDIA, Tesla and Meta saw strong rebounds, while financials struggled in the wake of the banking sector disruption.

Source: Morningstar Direct. As of March 31, 2023.

Country Total Returns (%) – Top 10 Largest Economies

Global equity markets saw a strong rebound following disappointing 2022 results. Europe was the standout for the quarter compared to both the U.S. and emerging markets. Areas such as Germany, France, and Italy saw strong rallies as the warmer than expected winter alleviated concerns over Russia's grip on commodity supplies in the region. China saw positive gains as the country continues to benefit from the re-opening trade while India struggled; Adani Group, a large Indian conglomerate, had multiple companies fall over 50 percent in the quarter.
